PRODUCT
TUPPERWARE water containers

GO ECO with Tupperware's reusable containers. Disposable containers and bottles may be convenient, but they pose a massive environmental and health risk. More and more forest land is being cleared to create landfills to contain trash; and our garbage residue contaminates the soil and pollutes drinking water.

Now you can make your kitchen and lifestyle more eco-friendly, but without losing any of the convenience, with Tupperware containers. Designed for long-term use, Tupperware water containers are made from safe, non-toxic materials that do not release harmful

chemicals into its contents. They are also 100 per cent food-safe and reusable. Plus, you don't have to worry about toxic colourants either as Tupperware's colourants are registered on the French Positive List, the most stringent in the world.

With a size for everyone, and every occasion, there is no need for disposable water bottles or paper cups for your drinks. Instead, use Tupperware with total peace-of-mind, and stay safe and help save Planet Earth. For further information about Tupperware, call 800 601 1345, or visit www.tupperwarebrands.com.sg.

REUSE AND REDUCE

Carrying your water with you is now easier with Tupperware's water bottles, that come in a range of sizes and colours. By using these, you are adopting an eco-friendly habit by not opting for PET bottles and Styrofoam cups!
