BEST FOOD CONTAINER

Tupperware RiceSmart

FRESH RICE, EVERY TIME

With its first-in, first-out concept, say goodbye to rice storage woes

You consume it every day, and it's the staple food for everyone in the community. When you think about it, rice is a precious grain that provides you and your family nourishment at every meal. That's why it's all-important to keep rice properly to preserve its freshness. But when stored in conventional ways, you expose it to the

elements, and the rice becomes highly vulnerable to weevil infestation.

Tupperware RiceSmart puts those days behind us. A clever storage solution, it comes with a neat dispenser system – a drawer that dispenses exactly a standard cup's worth (150g) of rice with each slide out. No spills, no hassle, plus hygiene is

maintained. This system ensures that older grains get used first.

The design also has a built-in window that tells you when its contents are running low. Throw in its non-slip rubber base and detachable parts for easy cleaning, and the RiceSmart will be your trusted companion when using your daily staple!
