MARK OF EXCELLENCE

Trust in Tupperware

STAYING RELEVANT Brand soldiers on with mission to educate and empower

Did you know that Tupperware is listed as one of the greatest inventions of the 20th Century by the Guinness World Records?

With a three-year period to take products from concept to market, it's no wonder that Tupperware promises reliability and top-notch quality.

"Tupperware is a brand icon. We provide products that really work," said David Wong, Tupperware Brands Corporation area vice-president for South East Markets.

With the tagline "Simply good living solutions", Tupperware products are aesthetically pleasing, with intelligent designs for functional and reliable products.

"Everybody needs Tupperware. Our products are always relevant," he added.

Its innovative products include the FridgeSmart range, developed in collaboration with the Post-harvest Department at the University of Florida.

The product is designed with a special venting system, with two valves for different fruits and

"What makes our brand successful in Malaysia is the fact that the products give customers peace of mind"

vegetables so that the produce can "breathe" and thus remain fresh and crisp longer than conventional containers.

Then there is the GoFlex! containers, which are collapsible and expendable, fold flat and take up minimum storage space.

Meanwhile, the One Touch Canister is a top-selling item in Malaysia that allows food to stay fresh, and only requires one touch on its seal to ensure that it is airtight.

"What makes our brand successful in Malaysia is the fact that the products give customers peace of mind," said Wong.

The Tupperware quality lies in its research and development, and in its moulds. Each product has its own mould, which take between two and three years to develop.

Tupperware's mission in Malaysia is to educate, enlighten and empower women by offering them the opportunity to start their own business.

The 60-year old company has seen excellent growth on Malaysian soil for 45 years. Last year, the market here generated at least RM50 million

in sales. This is a clear indication of the trust Malaysians have in Tupperware.

Tupperware is an award-winning brand, having won numerous accolades for design excellence.

Its products are displayed in the Museum of Modern Art in New York, the Centre Pompidou in Paris, the Design Museum of London and the Smithsonian Institution in Washington.

The company is committed to sustainability, offering solutions to disposable products and other plastic containers. "We want to encourage more Malaysians to reduce their dependency on disposable plastic bags and styrofoam boxes, and shift to reusable containers," said Wong.

Under its corporate social responsibility initiatives, Tupperware Brands Malaysia conducts fundraising efforts for various causes.

As it moves into the future, Tupperware is committed to ensuring that its products are in every home and kitchen in Malaysia.

This year, it launched an innovative water filtration system using nanotechnology to provide clean and healthy drinking water.

"We are constantly innovating and next year, we plan to launch four or five new products. We also aim to be the direct seller of choice and we are confident of our growth in the next year."

Tupperware is a **brand icon** which provides products that really work.
